Completed on	Thursday, 30 July 2026, 4:21 PM
Time taken	48 mins 29 secs
Grade	100.00 out of 100.00

Question **1**

Correct

Mark 10.00 out of 10.00

Insert a record with EmployeeID **001**, Name **Sarah Parker**, Position **Manager**, Department **HR**, and Salary **60000** into the **Employee** table.

For example:

Test	Result				
SELECT * FROM Employee WHERE EmployeeID = 001;	EmployeeID	Name	Position	Department	Salary
	-----	-----	-----	-----	-----
	1	Sarah Parker	Manager	HR	60000

Answer: (penalty regime: 0 %)

```
1 INSERT INTO Employee (EmployeeID,Name,Position,Department,Salary)
2 VALUES (1, 'Sarah Parker', 'Manager', 'HR',60000);
```

	Test	Expected			Got			
✓	SELECT * FROM Employee WHERE EmployeeID = 001;	EmployeeID	Name	Position	EmployeeID	Name	Position	✓
		Department	Salary		Department	Salary		
		-----	-----	-----	-----	-----	-----	
		-----	-----	-----	-----	-----	-----	
		1	Sarah Parker	Manager	1	Sarah Parker	Manager	
		HR	60000		HR	60000		

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **2**

Correct

Mark 10.00 out of 10.00

Write a SQL query to add a new column **MobileNumber** of type **NUMBER** and a new column **Address** of type **VARCHAR(100)** to the **Student_details** table.

For example:

Test	Result					
pragma table_info('Student_details');	cid	name	type	notnu	dflt_value	pk
	0	RollNo	int	0		1
	1	Name	VARCHAR(100)	1		0
	2	Gender	TEXT	1		0
	3	Subject	VARCHAR(30)	0		0
	4	MARKS	INT (3)	0		0
	5	MobileNumber	NUMBER	0		0
	6	Address	VARCHAR(100)	0		0

Answer: (penalty regime: 0 %)

```
1 ALTER TABLE Student_details ADD
2 MobileNumber NUMBER;
3 ALTER TABLE Student_details ADD
4 Address VARCHAR(100);
5 |
```

	Test	Expected			Got			
✓	pragma table_info('Student_details');	cid	name	type	cid	name	type	✓
		notnu	dflt_value	pk	notnu	dflt_value	pk	
		----	-----	-----	----	-----	-----	
		0	RollNo	int	0	RollNo	int	
		0		1	0		1	
		1	Name	VARCHAR(100)	1	Name	VARCHAR(100)	
		1		0	1		0	
		2	Gender	TEXT	2	Gender	TEXT	
		1		0	1		0	
		3	Subject	VARCHAR(30)	3	Subject	VARCHAR(30)	
		0		0	0		0	
		4	MARKS	INT (3)	4	MARKS	INT (3)	
		0		0	0		0	
		5	MobileNumber	NUMBER	5	MobileNumber	NUMBER	
		0		0	0		0	
6	Address	VARCHAR(100)	6	Address	VARCHAR(100)			
0		0	0		0			

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **3**

Correct

Mark 10.00 out of 10.00

Create a table named *Members* with the following columns:

- *MemberID* as *INTEGER*
- *MemberName* as *TEXT*
- *JoinDate* as *DATE*

For example:

Test	Result					
pragma table_info('Members');	cid	name	type	notnull	dflt_value	pk
	-----	-----	-----	-----	-----	-----
	0	MemberID	INTEGER	0		0
	1	MemberName	TEXT	0		0
	2	JoinDate	DATE	0		0

Answer: (penalty regime: 0 %)

```

1 CREATE TABLE Members (
2   MemberID INTEGER,
3   MemberName TEXT,
4   JoinDate DATE
5 );

```

	Test	Expected			Got			
✓	pragma table_info('Members');	cid	name	type	cid	name	type	✓
		notnull	dflt_value	pk	notnull	dflt_value	pk	
		-----	-----	-----	-----	-----	-----	
		0	MemberID	INTEGER	0	MemberID	INTEGER	
		0		0	0		0	
		1	MemberName	TEXT	1	MemberName	TEXT	
		0		0	0		0	
		2	JoinDate	DATE	2	JoinDate	DATE	
		0		0	0		0	
✓	INSERT INTO Members (MemberID, MemberName, JoinDate) VALUES (1, 'James Wilson', '2024-08-01'); select * from Members;	MemberID	MemberName	JoinDate	MemberID	MemberName	JoinDate	✓
		-----	-----	-----	-----	-----	-----	
		-			-			
		1	James Wilson	2024-08-01	1	James Wilson	2024-08-01	
		01			01			

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question 4

Correct

Mark 10.00 out of 10.00

Create a table named **Attendance** with the following constraints:

- AttendanceID** as INTEGER should be the primary key.
- EmployeeID** as INTEGER should be a foreign key referencing **Employees(EmployeeID)**.
- AttendanceDate** as DATE.
- Status** as TEXT should be one of 'Present', 'Absent', 'Leave'.

For example:

Test	Result
INSERT INTO Attendance (AttendanceID, EmployeeID, AttendanceDate, Status) VALUES (1, 1, '2024-08-01', 'Present'); SELECT * FROM Attendance;	AttendanceID EmployeeID AttendanceDate Status ----- 1 1 2024-08-01 Present

Answer: (penalty regime: 0 %)

```
1 CREATE TABLE Attendance (AttendanceID
2 INTEGER PRIMARY KEY, EmployeeID
3 INTEGER, AttendanceDate DATE, Status
4 TEXT CHECK(Status IN
5 ('Present', 'Absent', 'Leave')), FOREIGN
6 KEY (EmployeeID) REFERENCES
7 Employees(EmployeeID));
8
```

	Test	Expected	Got	
✓	INSERT INTO Attendance (AttendanceID, EmployeeID, AttendanceDate, Status) VALUES (1, 1, '2024-08-01', 'Present'); SELECT * FROM Attendance;	AttendanceID EmployeeID AttendanceDate Status ----- 1 1 2024-08-01 Present	AttendanceID EmployeeID AttendanceDate Status ----- 1 1 2024-08-01 Present	✓
✓	INSERT INTO Attendance (AttendanceID, EmployeeID, AttendanceDate, Status) VALUES (3, 99, '2024-08-03', 'Absent');	Error: FOREIGN KEY constraint failed	Error: FOREIGN KEY constraint failed	✓

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question 5

Correct

Mark 10.00 out of 10.00

Create a new table named **item** with the following specifications and constraints:

1. **item_id** as TEXT and as primary key.
2. **item_desc** as TEXT.
3. **rate** as INTEGER.
4. **icom_id** as TEXT with a length of 4.
5. **icom_id** is a foreign key referencing **com_id** in the **company** table.
6. The foreign key should cascade updates and deletes.
7. **item_desc** and **rate** should not accept NULL.

For example:

Test	Result			
INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); UPDATE company SET com_id='COM5' WHERE com_id='COM4'; SELECT * FROM item;	item_id	item_desc	rate	icom_id
	-----	-----	-----	-----
	ITM5	Charlie Gold	700	COM5

Answer: (penalty regime: 0 %)

```

1 CREATE TABLE item (item_id TEXT
2 PRIMARY KEY, item_desc TEXT NOT NULL,
3 rate INTEGER NOT NULL, icom_id TEXT,
4 FOREIGN KEY (icom_id) REFERENCES
5 company(com_id) ON UPDATE CASCADE ON
6 DELETE CASCADE);

```

	Test	Expected			Got			
✓	INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); UPDATE company SET com_id='COM5' WHERE com_id='COM4'; SELECT * FROM item;	item_id icom_id ----- ---- ----- ITM5 Charlie Gold 700 COM5	item_desc Charlie Gold	rate 700	item_id icom_id ----- ---- ----- ITM5 Charlie Gold 700 COM5	item_desc Charlie Gold	rate 700	✓
✓	INSERT INTO item VALUES("ITM6","Pea-n-Nut",14,"COM2"); INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); DELETE FROM company WHERE com_id='COM2'; SELECT * FROM item;	item_id icom_id ----- ---- ----- ITM5 Charlie Gold 700 COM4	item_desc Charlie Gold	rate 700	item_id icom_id ----- ---- ----- ITM5 Charlie Gold 700 COM4	item_desc Charlie Gold	rate 700	✓

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **6**

Correct

Mark 10.00 out of 10.00

Create a table named **Products** with the following constraints:

- **ProductID** as INTEGER should be the primary key.
- **ProductName** as TEXT should be unique and not NULL.
- **Price** as REAL should be greater than 0.
- **StockQuantity** as INTEGER should be non-negative.

For example:

Test	Result
<pre>INSERT INTO Products (ProductID, ProductName, Price, StockQuantity) VALUES (1, 'Laptop', 999.99, 10); select * from Products;</pre>	<pre>ProductID ProductName Price StockQuantity ----- 1 Laptop 999.99 10</pre>

Answer: (penalty regime: 0 %)

```
1 CREATE TABLE Products(ProductID
2 INTEGER PRIMARY KEY,ProductName TEXT
3 UNIQUE NOT NULL,Price REAL
4 CHECK(Price>0),StockQuantity INTEGER
5 CHECK(StockQuantity>=0));
```

	Test	Expected	Got	
✓	<pre>INSERT INTO Products (ProductID, ProductName, Price, StockQuantity) VALUES (1, 'Laptop', 999.99, 10); select * from Products;</pre>	<pre>ProductID ProductName Price StockQuantity ----- 1 Laptop 999.99 10</pre>	<pre>ProductID ProductName Price StockQuantity ----- 1 Laptop 999.99 10</pre>	✓
✓	<pre>INSERT INTO Products (ProductID, ProductName, Price, StockQuantity) VALUES (2, 'Smartphone', 200, 50),(3, 'Smartphone', 100, 50);</pre>	Error: UNIQUE constraint failed: Products.ProductName	Error: UNIQUE constraint failed: Products.ProductName	✓

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **7**

Correct

Mark 10.00 out of 10.00

Create a new table named **item** with the following specifications and constraints:

1. **item_id** as TEXT and as primary key.
2. **item_desc** as TEXT.
3. **rate** as INTEGER.
4. **icom_id** as TEXT with a length of 4.
5. **icom_id** is a foreign key referencing **com_id** in the **company** table.
6. The foreign key should set NULL on updates and deletes.
7. **item_desc** and **rate** should not accept NULL.

For example:

Test	Result			
INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); UPDATE company SET com_id='COM5' WHERE com_id='COM4'; SELECT * FROM item;	item_id	item_desc	rate	icom_id
	-----	-----	-----	-----
	ITM5	Charlie Gold	700	

Answer: (penalty regime: 0 %)

```

1 CREATE TABLE item(item_id TEXT PRIMARY
2 KEY,item_desc TEXT NOT NULL,rate
3 INTEGER NOT NULL,icom_id TEXT
4 REFERENCES company(com_id) ON UPDATE
5 SET NULL ON DELETE SET NULL);

```

	Test	Expected			Got			
✓	INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); UPDATE company SET com_id='COM5' WHERE com_id='COM4'; SELECT * FROM item;	item_id icom_id ----- ----	item_desc ----- -----	rate ----- -----	item_id icom_id ----- -----	item_desc ----- -----	rate ----- -----	✓
		ITM5	Charlie Gold	700	ITM5	Charlie Gold	700	
✓	INSERT INTO item VALUES("ITM6","Pea-n-Nut",14,"COM2"); INSERT INTO item VALUES("ITM5","Charlie Gold",700,"COM4"); DELETE FROM company WHERE com_id='COM2'; SELECT * FROM item;	item_id icom_id ----- --	item_desc ----- -----	rate ----- -----	item_id icom_id ----- --	item_desc ----- -----	rate ----- -----	✓
		ITM6	Pea-n-Nut	14	ITM6	Pea-n-Nut	14	
		ITM5	Charlie Go	700	ITM5	Charlie Go	700	
		COM4			COM4			

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **8**

Correct

Mark 10.00 out of 10.00

In the **Books** table, insert a record where some fields are **NULL**, another record where all fields are filled without any **NULL** values, and a third record where some fields are filled, and others are left as **NULL**.

ISBN	Title	Author	Publisher	Year
-----	-----	-----	-----	-----
978-1234567890	Introduction to AI	John Doe		
978-9876543210	Deep Learning	Jane Doe	TechPress	2022
978-1122334455	Cybersecurity Essentials	Alice Smith		2021

For example:

Test	Result				
SELECT * FROM Books;	ISBN	Title	Author	Publisher	Year
	-----	-----	-----	-----	-----
	978-1234567890	Introduction to AI	John Doe		
	978-9876543210	Deep Learning	Jane Doe	TechPress	2022
	978-1122334455	Cybersecurity Essentials	Alice Smith		2021

Answer: (penalty regime: 0 %)

```

1 INSERT INTO
2 Books(ISBN,Title,Author,Publisher,Year
3 )
4 VALUES('978-1234567890','Introduction to AI','John Doe',NULL,NULL),
5 ('978-9876543210','Deep Learning','Jane Doe','TechPress',2022),

Correct

Marks for this submission: 10.00/10.00.

Question **9**

Correct

Mark 10.00 out of 10.00

Write a SQL Query to Rename attribute "name" to "first_name" and add mobilenumber as number ,DOB as Date,State as varchar(30) in the table Companies.

For example:

Test	Result					
pragma table_info('Companies');	cid	name	type	notnull	dflt_value	pk
	0	id	int	0		0
	1	first_name	varchar(50)	0		0
	2	address	text	0		0
	3	email	varchar(50)	0		0
	4	phone	varchar(10)	0		0
	5	mobilenumb	number	0		0
	6	DOB	Date	0		0
	7	State	varchar(30)	0		0

Answer: (penalty regime: 0 %)

```

1 ALTER TABLE Companies RENAME COLUMN
2 name TO first_name;
3 ALTER TABLE Companies ADD mobilenumb
4 number;
5 ALTER TABLE Companies ADD DOB Date;
6 ALTER TABLE Companies ADD State
7 varchar(30);

```

	Test	Expected				Got				
✓	pragma table_info('Companies');	cid	name	type		cid	name	type		✓
		notnull	dflt_value	pk		notnull	dflt_value	pk		
		-----	-----	-----	---	-----	-----	-----	---	
		-----	-----	-----		-----	-----	-----		
		0	id	int	0	0	id	int	0	
		0				0				
		1	first_name	varchar(50	0	1	first_name	varchar(50	0	
		0				0				
		2	address	text	0	2	address	text	0	
		0				0				
		3	email	varchar(50	0	3	email	varchar(50	0	
		0				0				
		4	phone	varchar(10	0	4	phone	varchar(10	0	
		0				0				
		5	mobilenumb	number	0	5	mobilenumb	number	0	
		0				0				
		6	DOB	Date	0	6	DOB	Date	0	
		0				0				
		7	State	varchar(30	0	7	State	varchar(30	0	
		0				0				

Passed all tests! ✓

Correct

Marks for this submission: 10.00/10.00.

Question **10**

Correct

Mark 10.00 out of 10.00

Insert all books from `Out_of_print_books` into `Books`Table attributes are `ISBN`, `Title`, `Author`, `Publisher`, `YearPublished`**For example:**

Test	Result				
select * from Books;	ISBN	Title	Author	Publisher	YearPublished
	-----	-----	-----	-----	-----
	978-1234567890	The Lost World	Arthur Conan Doyle	Vintage Books	1912
	978-0987654321	Gone with the	Margaret Mitchell	Macmillan	1936
	978-1122334455	Moby Dick	Herman Melville	Harper & Brot	1851

Answer: (penalty regime: 0 %)

```

1 | INSERT INTO Books SELECT * FROM
2 | Out_of_print_books

```

	Test	Expected			Got			
✓	select * from Books;	ISBN	Title	Author	ISBN	Title	Author	✓
		Publisher	YearPublished		Publisher	YearPublished
